Job Description

The opening starts immediately. The mechanic's primary job function is to keep all the Course maintenance equipment running efficiently and effectively. This equipment ranges from small gas engines; golf carts, blowers, weed whackers etc. all the way to full size tractors and every piece of equipment in between.

Performing preventative maintenance is equally as important as having the ability to diagnose and fix all of the facility's maintenance equipment. The ability to turn a wrench along with the innate ability to put the puzzle pieces back together again are the keys to success in this position.

By far the most important skill needed is a solid work ethic. If you want to work in a fun, low stress environment, where you are in charge of exactly what your day's work will look like, then this is the job for you. This is a wonderful opportunity for someone interested in becoming part of our growing dynamic team.

Salary for this position is negotiable and based on mechanic experience.

A signing bonus of \$250 will be paid if the new mechanic is still working with us after 90 days, an additional \$250 after 180 days and another \$500 if he or she is still with us after one year. Giving the new hire an additional \$1,000 for simply being with us for over a year.
